

# Volkswagen Type 2 (T1) Bus Rechargeable Bluetooth® Speaker

Official Licensed  
Product

## User Manual

### Connecting to Bluetooth®:

- 1) Turn your speaker on by pressing and holding the power button on the rear of the van. The LED will flash yellow and the speaker will sound to show it is switched on. This will automatically switch the Bluetooth on too.
- 2) The speaker will automatically attempt to reconnect to the last device it was paired to. If the device is not in range, or it is the first time you have connected, it will go into pairing mode.
- 3) You can now pair your device with the speaker. Make sure Bluetooth is activated on your device, then select **VW Camper** from the list of available devices.
- 4) The speaker will sound when the device has been successfully connected, and the LED will turn to a solid yellow light. Using your device you can now play music. Use the device controls to change the volume.

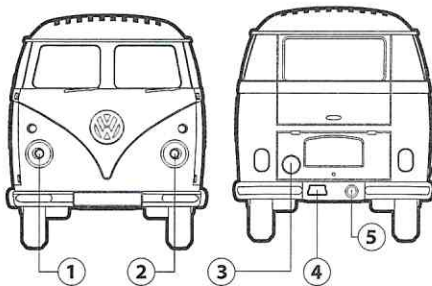

### Troubleshooting:

If you are having problems connecting, it may be because another device is already connected. Press the power button for 1 second to break this connection (any longer will turn the unit off). If you are still having problems turn your Bluetooth and the speaker off, then restart the instructions listed above.

### Using the audio jack:

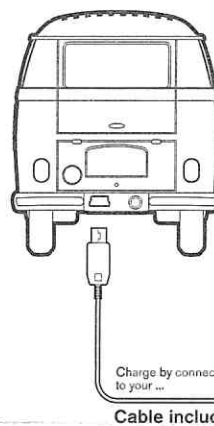

If your device does not support Bluetooth, you will need to use an AUX cable (not included) to connect directly to the speaker. When this type of connection is used the Bluetooth mode will switch off automatically, and the LED will not light.

### Description of Parts:

- |                          |                         |
|--------------------------|-------------------------|
| ① ②                      | ③                       |
| Headlamp indicator light | On/Off Button           |
|                          | ④                       |
|                          | Mini USB for charging   |
|                          | ⑤                       |
